Dear Client

### Fuel Shortages

By its very nature, the freight industry is very dependant on fuel, and the availability thereof. UTi Sun Couriers is no exception and the current fuel shortages experienced around the country will potentially have a direct impact on our ability to deliver. Shortages are being experienced nationwide, with Gauteng being the most severely affected.

While our depots have stocked up with as much fuel as is possible, should the strike action in the petroleum sector continue for much longer we will need to carefully consider how best to use the fuel we have available. This situation affects not only UTi Sun Couriers but many of our partners who we rely on to move our freight between destinations.

We will make every effort to continue to deliver to our service levels during this period but ask for your understanding should delays be experienced. If you have urgent shipments please contact the National Contact Centre and advise our staff accordingly.

We thank you in advance for your patience and understanding in this matter.

Yours sincerely

George van der Merwe
