Dear Clients,

The electricity supply problems in South Africa are widely known. Many businesses and households have already been severely affected by the intermittent interruptions in the power supply. UTi Sun Couriers has also experienced rolling black outs at many of our branches nationally.

These black outs are far reaching and affect many areas of operations, from telephones to computer equipment. In addition, our drivers are affected on the roads by traffic congestion caused by non-working robots. Unfortunately, the unpredictability of the interruptions in power makes it very difficult for us to proactively plan how to minimise the disruption to our service levels. However, we are making every effort to ensure that we continue to deliver to our clients according to service levels during this difficult time.

The situation is truly beyond our control and we ask for your understanding should you experience any delays with your packages. If you have any queries or an urgent shipment to process, please contact our National Contact Centre on 0861 80 30 80 where one of our consultants will be able to assist you, or visit our website www.sun.co.za to view tracking.

Yours sincerely

George van der Merwe
Managing Director
UTi Sun Couriers
