SUPPLY CHAIN SOLUTIONS THAT DELIVER.

HOW TO READ THE ROUTE GUIDE

Example shipment from Johannesburg to Port Shepstone.

1. Look up Johannesburg in Main Centre column of the Southern Africa Grid overleaf.
2. Each Main Centre is serviced by a Hub. If the Main Centre code and the Hub code columns are the same then the town is a Hub. If the two codes are different, the town is a Main Centre. Both the Main Centre code and Hub code are JHB for Johannesburg. It is therefore a Hub.
3. Look up Port Shepstone in the Main Centre Name row of the Southern Africa Grid overleaf.
4. The Main Centre code for Port Shepstone is PSH while its hub code is DUR (Durban). Port Shepstone is therefore a Main Centre
5. Cross reference the row for Johannesburg with the column for Port Shepstone. The number reached indicates which Route Number is applicable to the shipment
6. This Route Number determines transit times and rates for the shipment.
7. The applicable rate is client specific.
8. The transit time will depend on either the destination or origin own classification in the following order: Outlying, Regional, Main Centre and Hub

Note: If either town required does not appear on the Southern African Grid it may be a regional town. If this is the case, locate the required town name on the Regional Towns and Main Centres Grid. Identify the Main Centre Code applicable to the Regional Town (MNCT) then follow Step 5 above using the Main Centre Code as the column code.

SERVICE OPTIONS

SAME DAY | UTi offers a same day service between hubs for time sensitive packages. Additional charges apply.

EXPRESS | Delivery by 10h30 to hubs. Additional delivery time required for branches, regional and outlying towns.

SUNRISE OPTION | Delivery by 09h00 between hubs.

ECONOMY SERVICE (Road Freight) | Delivery within 1-3 days between hubs. Additional delivery time required for branches, regional and outlying towns.

NATIONAL CONTACT CENTRE 0861 80 30 80

NOTES ALL SERVICES

CONTRACT FOR CARRIAGE

All business undertaken by UTi is strictly subject to our Contract for Carriage. A copy is available on www.sun.co.za

DANGEROUS GOODS

UTi Distribution does not carry dangerous goods. The client is cautioned to avoid tendering to the Courier packages containing dangerous or hazardous goods, as liability in an event of a spillage or damage will pass onto the client.

THIRD PARTY COLLECTIONS

Collections can be arranged from other areas/main centres by using your account number. To ensure a smooth transaction, please be aware of some of the following:

- UTi Distribution will not be held liable for any 3rd Party collection discrepancies.
- It is the account holder's responsibility to ensure that all relevant information required to affect a successful delivery is communicated to the Sender.
- It is the Sender's responsibility to complete the dispatch note and tracking stickers in full, NOT the responsibility of the driver.

Instructions given to our National Contact Centre in respect of these collections, i.e. service levels / liability cover / special instructions, are for confirmation purposes only and will be telephonically communicated to the client. However, our National Contact Centre cannot ensure that these instructions are followed. If not indicated on the dispatch note, delays may occur due to factors beyond our control e.g. incomplete documentation, incompatible parcels, clients not ready.

LARGE VOLUME COLLECTIONS

Should you, the client, have very large volumes to ship on any given day (i.e. volumes much larger than your normal daily volumes), we request that you provide us with 24-hour notice of such volumes in order that we may adequately plan the correct resources to ensure your requirements are met.

TOLERABLE PACKAGE SIZE AND WEIGHT

Capacity limits of aircraft and vehicles restrict the size of packages that can be accommodated.

As most of our packages will go on our automated conveyor belt system, it is our recommendation that each package does not exceed 35kgs in weight and 1m in any one dimension. This is the internationally accepted norm for man-handable packages and should assist in ensuring that packages reach their destination intact.

If your package exceeds the recommended weight and dimensions, collection arrangements must be made at least 2 hours prior to the collection time. Surcharges may be charged for freight of this nature.

Note: Most of our regional towns are serviced by 1-tonne bakkies.

Please enquire with our National Contact Centre or local Operations personnel if you require clarity in this regard.

PACKAGING OF FRAGILE AND VALUABLE GOODS

The client is cautioned to avoid tendering to the Courier parcels containing fragile or valuable goods, and should the client do so, the client is obliged to pack and label goods to minimise the additional risk to which such items may be exposed. Whether or not the client has observed the terms of this clause, the client indemnifies the Courier against any loss or damage (including consequential damages), arising out of the carriage of fragile goods.

Make use of foam padding to cushion contents from impact caused through handling and transport. Never pack brittle articles together e.g. glass against glass. Damage to contents without visible damage to outer packaging usually occurs as a result of inadequate interior protection. Transport processes expose parcels to minor impact shocks all the time. Please help us to help you by packaging with this in mind.

ADDRESSES AND LABELS

Please ensure that EVERY PARCEL has a clear and full physical address on it. Do not forget to include the destination TOWN or CITY and POSTCODE. Many cities have similar named suburbs.

Every package MUST display a UTi Barcode Tracking Sticker. Record the tracking numbers on your dispatch document in case of a query.

SERVICE LEVEL

If a service level is not clearly specified, UTi will provide and charge for the Economy Service.

SERVICE GUARANTEES

ONLY Express services to hubs are guaranteed (refer to Southern Africa Grid where the town abbreviation and hub are the same). Express is not guaranteed to or from a "regional town".

Only the difference between economy and express charges will be refunded on application if an express delivery standard is not met, provided application is lodged within 48 hours of delivery. Backdated claims for Service Guarantee refunds will NOT be met. No refund will be given if the service failure was caused or aggravated by circumstances outside the normal transport process, including but not limited to unrest, extreme weather, actions of client or consignee.

LIABILITY COVER

UTi Distribution will not entertain any claim if "liability cover" was not requested on the dispatch note. The Courier's liability, only if requested by the client, in respect of goods in its care shall terminate on delivery to the Consignee. The dispatch note must clearly indicate the value of the goods if liability cover is required. If no liability cover is required, indicate clearly with a "0". For further information and conditions, refer to our Contract for Carriage on the back of the dispatch note and on www.sun.co.za.

CHARGEABLE MASS

The greater of Gross and Volume by Mass: (Height (cm) x Breadth (cm) x Length (cm)) divided the volumetric factor. This is applicable to all services - both Domestic and International.

FUEL

The fuel surcharge is based on the fluctuating price of wholesale diesel on the 1st Wednesday of every month. Calculation is based on the wholesale price of diesel inland 0.05 sulphur from a base applied in January 2009. The fluctuation of the surcharge each month will depend on the government announced, Energy and Mineral Affairs confirmed fuel prices, which are effective from the first Wednesday of each month.

The use of surcharges also means that any reduction in the price of fuels will immediately be passed on to our clients. The current monthly surcharge is reflected on your invoice and is available through your local National Contact Centre.

RATES REVIEW

UTi Distribution reserves the right to review the Rating Structure, should the actual volumes be less than the projected volumes indicated by the client. Rates are reviewed on an annual basis in the month of January, or as otherwise required.
