UTi Sun Couriers runs an internal data capture system to accurately record when a parcel has been delivered. Via this system, clients can download Confirmation of Delivery information as well as digital Proof of Delivery (POD) images of the actual signed delivery note, guaranteeing peace of mind.

There are multiple methods for accessing confirmed POD, and multiple formats for confirming a parcel has been delivered. Confirmed delivery documents and POD images are automatically archived for historical tracing purposes.

Options for retrieval of confirmations

- **Using our Proof of Delivery solutions:**
 - Receive specified PODs via facsimile or email in Adobe Acrobat PDF format directly to your desk. This facility can be automatic or used as and when required.
 - Receive a CD containing all POD images on a weekly, monthly or specified date basis. Using a simple browser user interface, you are able to search for certain PODs, and images can be used within your system for revenue collection.
 - If you are a pre-registered client you are able to download PODs directly from the Internet, enjoying high speed access to documentation from your own desktop.
- Through our Client Dispatching Solution, a multi-user, client dispatching and reporting system that connects directly to our network.
- Through our Integrated IT Solution, an advanced dispatch management software solution, designed to allow you complete control over the dispatch process.

Confirming delivery and having proof has never been easier. Simply contact UTi Sun Couriers and enjoy peace of mind.
